

Professional Coil Cleaning Solution

InstaCleanCIP is a professional-strength coil cleaner in pre-measured powder packs. Mix with water onsite for custom-strength cleaning power.

POWERFUL CLEANING | CUSTOM STRENGTH | EASY TO USE

Are clean coils really that important?

When coils become dirty, heat transfer efficiency is reduced, causing HVAC systems to operate under greater strain. This added demand increases energy usage, raises utility expenses, and can shorten the lifespan of the equipment. Over time, untreated coils may also be more vulnerable to corrosion and odor-related issues.

Why InstaCleanCIP?

Mix to Desired Strength

One 4 oz pack makes one gallon. Adjust dilution to match the job, from light soil to heavy grease.

Easy & Efficient

Lightweight, non-leaking powder packs save storage space and reduce transport hassles.

Professional Cleaning

Removes grease, grime, hair, dander, and debris from all types of coils.

Safe for All Coils

Safe for evaporator and condenser coils with a corrosion-inhibiting formula.

Professional coil cleaning power in a compact and convenient package
